PROJECT HEADQUARTERS

U-2 FLYING REQUIREMENTS

1. PURPOSE: To Supplement Headquarters Directives as regards U-2 proficiency training at [REDACTED]

2. RESPONSIBILITY: It is the responsibility of the Director of Operations to insure that all U-2 pilots maintain the degree of proficiency required by Project Headquarters Directive [REDACTED] and this Supplement.

3. GENERAL: The following proficiency training guidelines are established as a supplement to Headquarters requirements to insure that all mission pilots maintain a high degree of basic proficiency and a more efficient use of scheduled flying time:

a. Desired Proficiency Training items to be accomplished by each mission pilot during each training quarter are:

- (1) Jet penetrations - 12
- (2) Non-precision approaches - 12
- (3) Precision approaches - 18
- (4) SFO patterns - 10
  - (a) with flaps - 10
  - (b) without flaps - 6
- (5) No flap landings

b. The following restrictions apply to proficiency training items:

(1) Proficiency training items may not be accomplished on a sortie after four (4) hours duration, except that one precision or one non-precision approach may be accomplished on a sortie after four (4) hours of flight.

(2) Precision and non-precision low approaches will normally not be continued below published minimums. This will provide training in leveloff for actual instrument conditions while adding a safety factor.

- (3) GCA low approaches may be flown during IFR conditions if traffic permits and with tower approval.
  - (4) No-flap landing practice may be accomplished on touch and go landings. Practice full stop no-flap landings will not be made.
  - (5) Touch and go landings are not permitted under the following conditions:
    - {a} After 4 hours of flight.
    - {b} Total winds in excess of 25 knots.
    - {c} Crosswind component in excess of 10 knots.
- c. Mission accomplishment forms (MAF) (Attachment 1) will be accomplished for each scheduled flight as follows:
- (1) The Operations section will fill out the "Scheduled" column of the MAF prior to mission briefing.
  - (2) The mission pilot will complete the "Accom" column of the MAF during mission debriefing.
  - (3) The Operations section will insure the information is logged on the appropriate chart.
- d. Operationally Ready ("OR") pilot proficiency requirements are as follows:
- (1) Pilots assigned to this Detachment will be required to demonstrate a high degree of proficiency in all aspects of mission related activities. A pilot showing lack of proficiency in any area, may be removed from Operational Ready status by the Manager (IAW para 3a of [redacted] until subject pilot again demonstrates the proficiency necessary for "OR" Pilot status. The following guidelines, applied against both Operational and Training Missions, will determine when a pilot is to be removed from "OR" Pilot status.

- (a) Inability to maintain photo flight lines within 2 NM of planned track, unless there are extenuating circumstances, i.e.; weather, systems activity, etc.
  - (b) Consistent failure to operate equipment as briefed.
  - (c) Any other indications of lack of proficiency that could cause degradation of a mission or demonstrate an unsafe trend.
- (2) After a pilot has been placed in "Qualified U-2 Pilot Status" for the above reasons, he will be scheduled for extensive retraining until he again demonstrates the proficiency required of an "OR" Pilot.
